THE NEW CANADA Montreal in 1905 - Enormous Extent of Dominion's Resources - Yield of Wheat Belt - Vast Unexplored Territory.

BY FRANK G. CARPENTER.

gold, copper and other minerals. CANADA-A NEW COUNTRY.

a or givel discovery is concerned

it is the oldest terri of North America.
Leff Ercoem a Norwegian discovered Newfoundamid and New Sectla by sattling down, from Isoland almost 500 years before Columbys there across the Atlantic and issided upon the West Indies. John Cahot was the rest arrival a little after Columbus and it was about a generation later that the French sent out Jacques Carter, who discovered the mouth of the St. Lawrence and sailed up through it to Quebec. The next year he made big way as far as Montreal and give the French their title to Canada by right of discovery. The French settled that part of Canada. There are a million and a haif French Canada to share and the people of that region still speak French and have papers published in that language.

published in that inneusee.

Every American knows of the conquest of Canada by the British.

the biggest iron mines and they have all sorts of investments in the way of factories, lands, pulp mills and forests. What Americans are doing and what they can do should be interesting reading.

The same is true of our trade with Canada. We are spending vast sums sending Commissioners to all parts of the world to look up trade openings while we pay but little attention to the big possibilities near home. Canada is one of our best customers. We sell her twice as much goods as we buy from her.

She has a commerce worth half a million dollars every year, and it grows like a green bay tree. It is more valuable to Unde Sam than his trade with Japan. China or any other country outside Enterther the country outside Enterther was the country outside Enterther was the little caling to cultivate China or any other country outside Eu-rope, but he takes little pains to cuitivate it. What that trade is and how it may be bettered is worth the consideration of our Governmen and business men.

French spoken as I passed through the market on my way to the Mayor's office. There were notices printed in French pasted side by side with the English notices in the hallways, and every door had a French and English sign over it.

The Mayor was speaking in French to a delegation when I entered, and I was not surprised to find that he himself is of French-Canadian descent. His name is Mr. H. La Porte, and in addressing him one calls him "Your Worship." Mayor La Porte speaks English as well as French. About two-thirds of the city over which he rules is French; but the other third is English, and the business must, therefore, be conducted in both languages.

I opened the conversation by asking him to tell me something about the Montreal of 1906. His Worship replied:

"Montreal is thriving as never before. This increased in population 180,000 in the past five years. It has more than 400,000 citizens now, and it will soon have half a million.

"We are taking in the suburbs, just as your great cities have done, and are creating a Greater Montreal. We shall aid several suburbs to the city to-day. We "How about the first question."

Aunifered to find that he himself is of five years ago our sidewalks were almost all made of boards.

"We are now putting down fifteen miles of new pavement every year. There was an attempt some time ago to widen the old thoroughfares, but it cost so much that we had to call a halt. We are now going more slowly, but we are improving our streets. A few years ago our sidewalks were almost at many part of new pavement every year. There was an attempt some time ago to widen the old thoroughfares, but it cost so much that we had to call a halt. We are now going more slowly, but we are improving our streets. A few years ago our sidewalks were almost at many part of new pavement every year. There was an attempt year. There was an attempt

Sall be even worse. You will have to ask others that question."

MUNICIPAL OWNERSHIP.

"How about the city owning the franchises for great public utilities? is there any movement here in that direction?"

"Yes," replied the Mayor of Montreal. "I think we are slowly drifting toward municipal ownership, and the day may some time come when the city will own the street railroads, the lighting plants, and other things of that nature.

"We are now having trouble with gas companies, and we demand that they cut down there rate to consumers. We want a reduction of \$\theta\$ can be demand that they cut down there rate to consumers. We want as reduction of \$\theta\$ can bound a reduction of \$\theta\$ can be demand that they cut down there rate to consumers. We want as a shown and a reduction of \$\theta\$ can be demand that they cut down there rate to consumers. We want as thousand, and if Montreal will pay \$\theta\$ cents the companies should not complain.

"Are you a native of Montreal, your Worship?" I asked.

"No. I was born within fifteen miles of the city, but I came here as a boy and have lived in Montreal all my iffe. I like the city, and have every confidence in its immediate and ultimate prosperity." FRANK G CARPIENTER.

Fraince of the serious development o MUNICIPAL OWNERSHIP.

REPUBLIC SPECIAL

Boston. Nov. 11.—"W. Fleming" has been curator of the astronomical records of the Harvard Observatory since 127. In her care are some 100.000 plates, imaged in each innumerable stars. These plates are the report and record of the heavens for every night since 1356.

Patient study of these crowded registers has given "W. Fleming" a singular sift or aptitude—why not call it genius?—for picking out the new faces in these multitudes. "W. Fleming" notices certain unusual spectrum lines on a negative displaying star spectra.

Bhe verifies by means of the regular star negatives. Thus "W. Fleming" has found eighty-three stars in a cluster previously believed to contain but fifteen. "W. Fleming" is said to have discovered more stars than any other astronomer. And "W. Fleming" is a woman born in Dundee.

One Feigns Sickness; Companion Seeks Assistance of Pretty Station Agent, Who Promptly, Guards Cash Drawer.

FOILED BY A GIRL

REPUBLIC SPECIAL

New York, Nov. II.—Polled by the eleverness of the pretty ticket agent, Miss Ella Raul, of No. 56 Vanderbilt avenue. Brooklyn, two heavily velled women who tried to secure the receipts of the day at the Nostrand avenue station of the highest the avenue elevated road fied in great haste to excape arrest.

Alone in the station, Miss Raul's attention was attracted by the two women, who had just elepped from a train bound for Ridgewood.
